Dr. Eamonn Keogh

In completing this assignment I consulted:

- The Blind Search and Heuristic Search lecture slides and notes annotated from lecture.
- Python 2.7.14, 3.5, and 3.6 Documentation. This is the URL to the Table of Contents of 2.7.14:  
<https://docs.python.org/2/contents.html>

All important code is original. Unimportant subroutines that are not completely original are...

- Not applicable.
